

# NEW Release NEW Features

from ATRONIC's Systems Division

Welcome to GALAXIS™ Release 2.91.5-851.

Our latest Release gives you increased functionality, robust performance and new capabilities! Please find outlined below the most powerful new features:

## Player Solutions

**Happy birthday celebration – Make your players feel special**

A freely configurable happy birthday message can now be displayed to your players on the player interface as a welcome message when they insert their card. You can decide to show the message before, during and/or after the player's birthday. In order to make your player feel even more 'special', your player can also be automatically awarded with birthday points or a gift depending on his loyalty membership level.

**Promotion advertisement – Use the Player Interface as a versatile marketing tool**

A freely configurable promotional message can now be displayed to your players on the player interface as a welcome message when they insert their card. The message can be customised per membership level.

**Next level incentive – Boost slot plays**

The casino can configure messages that would be displayed on the player interface as 'next level incentive' by informing the player on the remaining amount of points to earn before being upgraded to the next level. No doubt this feature will boost your slots revenues!

## Linked Gaming Solutions: CHAIN REACTION™

**Participation with minimum bet – Prevent 'Jackpot hunters'**

CHAIN REACTION can now be configured to require a minimum bet for primary and secondary winners in order to prevent "JP hunters" from playing on all CHAIN REACTION machines with just one credit per game.

**ATRONIC®**

Great Games Great People

## Cashless Solutions

### qpon cash™ integration in GALAXIS™

As the industry leader in cashless solutions, ATRONIC's Systems Division now provides qpon cash as fully integrated in GALAXIS in order to provide more convenience for the users:

- Handle tickets in inventory
- qpon cash tickets being a new standard tender type, ticket transactions are available in all Star|CAGE standard procedures and reports

► **qpon cash is now available in Star|MARKETING (optional) allowing you to issue promotional tickets for your players.**

## CRYSTAL WEB

### Smoking break feature

Since the introduction of smoking bans in more and more countries in Europe, casinos have seen their revenues decreasing. In order to help casinos facing the smoking ban, ATRONIC's Systems Division now provides the smoking break feature, which enables the casinos to allow their players reserving their machine for a smoking break. Available for chip cash™ only; magstripe functionality to follow. The maximum authorised time frame can be configured by the operator.

For any further questions, or information required, please contact your Project Manager or Sales Representative. We are always at your service!
