

TABLE MANAGEMENT SOLUTIONS

Put a new spin on your table
management - move to a leading position

DisplayMaster™ adds excitement and entertainment to any Roulette table area. DisplayMaster displays game information and game history on its 22-inch state-of-the-art TFT screen, as well as running multi-media shows and display ticker messages. It's a thrilling way to connect with your players!

The DisplayMaster table management solution's centralised configuration abilities are the key to its performance. This cost-saving feature allows a new configuration to be applied to all displays with one click, all in real time.

DisplayMaster works with the Star|TABLES module or in standalone mode.

OPERATOR BENEFITS

- ✦ Improves the profitability of your entire table game operation
- ✦ Reduces operational costs by centralising configuration possibilities
- ✦ Enhances game experience with customisable multi-media features
- ✦ Increases player satisfaction by gaining tighter control of your multimedia assets

TABLE MANAGEMENT SOLUTIONS INCLUDE:

ATRONIC's **classic LED table displays** inform players about the game outcome on Roulette tables, as well as Black Jack, Punto Banco, Banca Francesea, and many more.

The **electronic chip tray** is a key component for an advanced information system. Used in combination with Star|TABLES, it gives a full real-time inventory of your table float and increases security and efficiency (no special chips required).

Serving as **Multi Table Display** and used for table games management, ATRONIC's DisplayEvolution can show the winning number history of up to 6 tables.
