

# TABLE MANAGEMENT SOLUTIONS

Put a new spin on your table management - move to a leading position

## Star|TABLES

ATRONIC's Table Management Solution is the foundation for the services and applications you need to realise the potential of your table business. Star|TABLES is designed to facilitate your daily table game operations providing a wide range of automated features that save time for the casino staff and hence save costs.

Flexibility requires a high level of integration, which is why Star|TABLES is fully integrated with all GALAXIS™ modules. The proven Star|CAGE module provides the tools for integrated fills/credits. When integrated with Star|MARKETING, a complete Player Tracking system is available to manage players and guests.

Designed to meet your business needs and budget, Star|TABLES manages the most popular games with a variety of hardware peripherals, containing a great range of table displays, and electronic chip trays.

## TABLE MANAGEMENT SOLUTIONS INCLUDE

### CardGate™

CardGate™ monitors Texas Hold'em Poker for three variants: No Limit, Pot Limit and Limit. For each hand, the pot amount is entered via a small numeric keypad and information is displayed on a flat screen in real time. CardGate™ is easy to use and features efficient reporting possibilities, as well as high security options.

### DisplayMaster™

ATRONIC's 22" screen display adds excitement and multimedia to any table area. DisplayMaster features centralised configuration abilities you will not find anywhere else. For further information, please refer to DisplayMaster product sheet.
